"The Innovator"

Shift Happens!®

Shift Happens!®: Thriving on Change

Go from business as usual to business as un-usual to leverage change and thrive during turbulent times.

This session identifies short-term opportunities that will create long-term benefits. Jim concentrates on overcoming entrenched cultures and habits, introducing innovative thinking and risk-taking to develop solutions that will have you lead the field by increasing value rather than reducing price.

You will learn how to accelerate change for success with a deliberate, disciplined methodology that delivers dramatic results.

Attitudes Are Caught – Not Taught®

Learn how to improve company morale to increase productivity, reduce stress, and retain your best people.

When change hits an organization, how people respond - their attitudes - can be the difference between success and failure. Attitudes define interactions, among employees, with management and, most important, with customers.

Jim introduces tangible techniques that make everyone part of the solution to capitalize on change rather than merely adapting to it.

Survivor Shifts: Outlast-Outwit-Outplay

Build a high-performance team that enhances productivity, increases profits and re-energizes the spirit of your organization.

Team-building is about understanding group dynamics and how they affect both individual and team performance.

Prior to the meeting, Jim works with you to identify those dynamics and the operational improvements you most need to address. Then, during the session, he focuses on activities to help your organization increase profits through improved teamwork and competitive positioning.

You'll leave with the skills and tools to mobilize your organization into a cohesive, high-performance unit.

INNOVATION

SPEAKING TOPICS

3DThinking™

Use the 3DThinking™ process to go beyond mere creativity to innovative problem solving, at every level, to impact your bottom-line.

We have been taught to think "outside the box". Yet, the problem is "inside the box". For that reason many companies have developed solutions to the wrong problems.

Jim has developed a three-dimensional process that will keep you from being "boxed out" by typical analytical thinking. Through **3DThinking™** you and your company will learn processes to develop new areas of innovation.

With **3DThinking™** Jim uses "try-angles" to "look inside the box" for the *DEPTH* of your knowledge, the *DISTANCE* to the solution, and the *DETERMINATION* to carry out your intentions. With **3DThinking™** you can increase performance, enhance productivity, and boost profits.

Stop The Stupid Stuff®

*Stop "Shoulding" All Over Yourself!
If you want a topic that is "unusual" or "different" this is for you. It is not for the timid.*

The factors that drive us to sweat the small stuff affect the decisions and choices we make in our business and personal lives. We all take steps that may not be productive and create obstacles to our progress.

This presentation reverses the perspective of everything you have ever heard. Instead of a "to do" list, Jim suggests you create a "to stop" list. We all need to **Stop the Stupid Stuff®**. In fact, we also need to stop "shoulding" all over ourselves.

If you want to have the audience engaged while laughing out loud, this is for you.

CUSTOMER SERVICE

SPEAKING TOPICS

Dating Your Customer®

Assist employees in developing an increased understanding of issues affecting the customer in your workplace by using company-specific case studies.

D♥A♥T♥I♥N♥G
Your Customer

True success is based on every employee's ability to serve the needs of the customer. Jim provides tools to teach your team simple, but profound customer service models, guaranteeing customer satisfaction.

Jim addresses both internal and external customers and charts their relationships. He provides feedback concerning the interrelatedness of different customer expectations.

Meaningful Memories®

We stimulate the creation of "customer insistence" where the new awareness transforms organizations from reducing prices to increasing value.

Meaningful Memories

Meaningful Memories are scrapbooks of the mind. They develop the "customer-defined" experience. Creating Meaningful Memories will "shift" your organization's mindset from transactions to transformations, breaking out of the insanity of focusing only on price.

This session helps define the differences between transactions and lasting memories. At Disney, it's the magic. At FedEx, it's overnight delivery... absolutely, positively guaranteed. At Volvo, it's the safety, and at Domino's Pizza, it's 30 minutes or less. Think about how Apple changed the way we purchased music. It wasn't the iPod but iTunes that changed our experience. The richest of experiences creates Meaningful Memories.

This program provides an excellent foundation of very insightful and practical actions to create maximum value for your customer and increased profits for your organization.
